

CNS-203-1W Basic Administration for Citrix NetScaler 9.2

This course covers the initial configuration and administration of Citrix NetScaler 9.2. Learners gain an understanding of NetScaler features such as load balancing, SSL offload, classic and advanced expressions, caching, compression, content switching, and AppExpert templates. Interactive instructor-led discussion and hands-on labs and exercises guide learners through administrator tasks preparing them to manage Citrix NetScaler 9.2 deployments.

Audience

This course is intended for system administrators or network administrators, who configure and administer Citrix NetScaler products.

Preparatory Recommendations

Before taking this course, Citrix recommends that learners have the following:

- Intermediate knowledge of TCP/IP and HTTP protocols and an understanding of the OSI model
- Experience with network devices such as routers and switches, various networking protocols and aspects of application and site architecture such as DMZ and VLANs
- Moderate exposure to UNIX or Linux
- Exposure to basic systems administration concepts, including logging, software upgrade procedures and high availability operations
- Familiarity with web server software such as Apache, IIS or WebSphere
- Basic knowledge of DNS, SSL, and compression concepts
- Understanding of concepts related to server load balancing and content switching
- Knowledge of network security threats and site protection concepts such as firewalls, worms, DDoS attacks

Key Skills

Upon completion of this course, learners are able to:

- Identify deployment considerations and network placement options
- Perform an initial configuration
- Identify NetScaler-owned IP addresses
- Configure virtual local area networks (VLANs)
- Configure reverse network address translation (RNAT)
- Configure access control lists
- Configure high availability
- Configure load balancing
- Configure SSL offload
- Configure global server load balancing (GSLB)
- Configure NetScaler features using classic and advanced policy expressions, including:
 - Content filtering
 - Content switching
 - Compression
 - Rewrite
 - Responder
 - URL transformation
 - Integrated caching
- Perform basic management, such as auditing, logging and monitoring

Instructional Method

This course is a self-paced online course with online material, interactions and the practical application of concepts through hands-on exercises.

Course Length

30 Hours

Certification Preparation

This course prepares students for exam 1Y1-A21 Basic Administration of Citrix NetScaler 9.2.

Registration

For more information and to register for this course, please go to www.citrixeducation.com

Topic Outline

Provided is the outline for CNS-203-1W:

- Module 1: Introductions and Course Overview
- Module 2: Introducing and Deploying Citrix NetScaler
- Module 3: Networking
- Module 4: Configuring High Availability
- Module 5: Securing Citrix NetScaler
- Module 6: Configuring Load Balancing
- Module 7: Configuring SSL Offload
- Module 8: Configuring Global Server Load Balancing
- Module 9: Using AppExpert Classic to Optimize Traffic
- Module 10: Using AppExpert with Responder, Rewrite and URL Transformation
- Module 11: Using AppExpert for Content Switching
- Module 12: Using AppExpert to Optimize Traffic
- Module 13: Management
